Agreement on the rights to written works and artifacts in Informatics at the University of Zurich

(The type of paper is defined on the registration form)

Current legislation states that the copyright of written works and any artifacts that have been produced in the process of completing them (in particular, software) remains with the student.

Because such work is created under the immediate supervision of the mentoring teaching and research assistants and professors, is based to a significant degree on their ideas, and relies on the use of the resources of the department, the student must grant the Department of Informatics the rights of use to such work by way of the following declaration.

I, **Linda Samsinger**, hereby grant the University of Zurich, as represented by the Department of Informatics, the irrevocable, non-exclusive, transferable, and sub-licensable rights of use, free of charge, to my written work and to all of the artifacts under copyright protection created in the context of the work (in particular, software). Furthermore, I agree that the Department of Informatics may publish my work in its entirety and/or in the form of extracts on the Internet, and may distribute printed versions thereof to interested parties.
